

ATTACHMENT

~~CONFIDENTIAL~~ 28 May 1963

1. DDTR returned the basic memorandum and requested that a recommendation from the meeting be attached. Consequently this memorandum is forwarded to the School Chiefs for their concurrence or non-concurrence. C/ISB/TR was out-of-town when this memo was completed, but via telephone gave his approval to the recommended items in Paragraph 8.

2. Contact was made with [REDACTED] He in turn wrote up the results of the meeting for his superiors. It is his opinion, and appears to be shared by his superiors, that [REDACTED] will not take any steps at the present time to acquire any closed circuit equipment other than the planning and installation of conduit facilities in their new building. He stated that their present plans will allocate money for the teleprompting system and he anticipates that no extra allocation will be available for television equipment.

3. In light of Paragraph 8 of the basic memorandum, a total of \$20,000 would leave several thousand dollars leeway in case modified equipment would be desired; that is, a better or different type of camera; additional lens, and the like.

4. It is therefore recommended that OTR allocate \$20,000 to be used for the purchase of a closed circuit TV system as described above. C/ISB/TR and his staff would be the logical OTR technicians to work with the commercial distributors to determine the exact model items of equipment to be purchased.
